PTRC website launched.

[Click here to see it.](#)

PTRC is a registered voluntary organization working on the issue of Occupational Safety and Health. It was registered in 1992 under Societies Registration Act and Bombay Public Trust Act. It is also Registered under Foreign Contribution Regulation Act.

Even before PTRC was registered in 1992, various activities were carried out to generate awareness and attract wider public attention towards occupational health and safety problems through Vyavsaik Syasthya Suraksha Mandal, a group of industrial workers, since 1986. When we realized the need for sustained efforts at various industrial centers in Gujarat, PTRC was born. Major role played by PTRC is to train shop floor workers in occupational safety & health and HIV/AIDS. It also imparts adolescent education in school. Till now PTRC has trained over 500 shop floor workers and trade union activities from all over the State in occupational safety & health. It has imparted information on HIV/AIDS to over 25,000 industrial workers and given adolescence education to over 3000 students in schools in Baroda .
